INTRODUCTION

Ellmer Construction has attained an enviable reputation in the market place by adhering to the simple principal of delivering the highest standards, 'on budget, on time.'

One of the ways we maintain these standards is by building the strongest possible relationships with both new and existing clients. In achieving this objective, we are able to identify their requirements throughout the project, from conception through to completion.

The core markets sectors in which we operate are:

- Hotel & Leisure
- Residential
- Commercial
- Retail
- Education

Wilson Bayly Holmes-Ovcon Limited - South Africa

Wilson Bayly Holmes-Ovcon Limited - UK

ABOUT ELLMERS

Understanding the Client's key drivers and identifying the roles, responsibilities and expectations of every team member to ensure a successful project outcome for all concerned.

Our business activity has traditionally been from across most sectors of the industry with a substantial percentage as a result of referral and/or repeat appointment from Client's and their teams as a result of previous successful project outcomes.

Having been established for over 150 years, our reputation has been built on trust and quality. Our directly employed staff, tradesmen and operatives have a wealth of experience across all work sectors.

This retained knowledge is reinforced by our pre-qualified and professional supply chain.

CURRENT PROJECTS

BRIGHTON COLLEGE

VALUE
£24.80 million

LOCATION
Brighton,
BN2

In Progress

Ellmer have been appointed to deliver two student residential boarding houses for Brighton college, including staff accommodation for the Head and Deputy Housemasters together with ancillary support spaces. One boarding house is accommodated within the refurbished 19th century Walpole Lodge known as The Villa, along with the later added Chapel and interstitial Dormitory Wing referred to as The Annex. A separate contemporary new build boarding house is being constructed on the same site opposite The Villa. In addition, two existing terraced properties fronting Belle Vue Gardens and Eastern Road are being refurbished to provide dedicated staff residential accommodation.

PARK INTERNATIONAL HOTEL

VALUE
Confidential

LOCATION
*Kensington,
SW1*

In Progress

Ellmers is delivering the transformation of the Park International Hotel in Kensington into the client’s new Capri Hotel brand. The project includes structural alterations to better integrate and rationalise the layout of seven interconnected buildings, enhancing flow and functionality. Works also include the creation of new public areas—reception, lounge, bar, gym, meeting and breakfast rooms—phased refurbishment of 181 bedrooms, and upgrades to back-of-house facilities. In addition, we are carrying out strip-out, damp proofing, roof replacement, façade remedials, scaffolding, and MEPH works, . We are also delivering two fully fitted mock-up rooms and corridor sections, complete with all finishes, services, and FF&E.

LORD'S ALLEN STAND

VALUE

£16.5 million

LOCATION

St Johns Wood
NW8

In Progress

The existing Allen Stand will be demolished and replaced with a new stand built to modern standards within a similar footprint. It will include lifts, level access, accessible WCs, a refectory, and a 60-cover restaurant with terrace access.

Improvements to the Members’ terrace bar include a new roof, opened rear façade, and a lift-served accessible WC and seating. A new upper-level bridge will link the Allen Stand to the Pavilion, improving circulation and access.

SHANGRI-LA

HOTEL EXPERIENCE

VALUE
£47.50 million

LOCATION
London,
SE1

COMPLETED
2015

Byrne Group completed the fit-out of the Shangri-La at The Shard Hotel within Western Europe's tallest building, creating the operator's flagship hotel in Europe.

The luxury accommodation comprised 202 guest rooms and suites across Levels 36 to 50, each offering spectacular views of the London skyline through floor-to-ceiling windows. The fit-out team successfully overcame the challenges presented by the building's distinctive angular form, with each guest room featuring its own unique footprint. The hotel also featured three signature spaces: the Shangri-La Suite on Level 39, providing 180-degree views of London stretching from the Houses of Parliament to Canary Wharf; Gong on Level 52, London's highest bar; and Ting, the signature restaurant located on Level 35.

Additional facilities included a ground-floor delicatessen, an infinity pool, and a gym on Level 52. The exacting timescales, challenging logistics, and stringent quality requirements made this one of the company's finest achievements.

COMPLETED
2014

Sea Containers House was a project to completely revitalise a 1970's landmark riverside building. The Byrne Group scope of works consisted of the conversion of the existing structure to form a new four-star, 356-bedroom hotel and high quality office accommodation.

Ellmers undertook the complete fit-out of the gym, spa and relaxation room including saunas and Hammam Spa in the basement areas. The lower ground floor fit-out contained a private cinema, meeting rooms, break out area and kitchen. The ground floor reception included a copper clad hall feature reception area, restaurant and private dining area fit-out, bar areas, reception lobby and lounge, and show kitchen. The roof top bar fit-out was also completed. WC fit out from basement to

BULGARI HOTEL

HOTEL EXPERIENCE

VALUE	LOCATION	COMPLETED
Byrne Bros; £9.00 million Ellmers; £9.00 million	London, SW7	2012

The Bulgari Hotel in London was set in the heart of Knightsbridge, one of the city’s most prestigious neighbourhoods. Byrne Bros. were awarded the sub and superstructure contract in February 2010, whilst Ellmers were responsible for the complete fit out of six guest floors plus the exclusive Bulgari Suites.

Every element of the guestrooms demonstrated Bulgari’s famous attention to detail. Exquisite marbles, fine woods and unique detailing blended English style with Italian heritage. Many furnishings were exclusive to Bulgari, creating a unique intimate feel. Rich, refined Italian silk fabrics featured an elaborate floral and foliate pattern inspired by the silver Bulgari Chatelaine. The large bathrooms featured freestanding baths and showers in exquisite Marquina marble and white glass.

THE CONNAUGHT

VALUE
£26.00 million

LOCATION
Mayfair,
W1K

COMPLETED
2009

The full refurbishment of the existing hotel consisted of 90 guestrooms including penthouse suites. The external façade was extensively renovated and the roof, basement, ground floor and 12 Adams Row were remodelled. A new lift shaft was installed and the existing lifts were replaced. Two floors of guest rooms, communal areas, along with back of house areas and kitchens were refurbished. These four kitchens, at a cost of over £1 million, served in total 500 covers, two bars and offered 24 hour room service to 120 rooms. This included a Michelin Star kitchen serving 100 covers.

After the completion of the main works, the formation of a centrepiece fountain in Charles Place was undertaken. Designed by world-renowned designer Tadao Ando, this fountain was completed in just 8 weeks with piled foundations, steelwork grillage and concrete base, finished in granite and glass with fibre optic lights and mist effects encircling the embedded mature trees.

THE SAVOY

VALUE
£180.00 million (Group)
£20.00 million (Ellmers)

LOCATION
London,
WC2

COMPLETED
2009

The restoration of The Savoy was the most ambitious hotel restoration project ever undertaken in London. Between the time her doors were closed to guests and their re-opening in October 2010, The Savoy was taken back to her early structure, stabilised and given an entirely new services infrastructure. Spaces were rationalised, existing architectural and design gems were carefully restored or replicated and a new lift was introduced, as were new kitchens.

Many of the spaces were returned looking just as they did before; other areas were “rediscovered” to become glamorous new spaces. Most importantly of all, the quintessential spirit and the design heritage of The Savoy were preserved and even enhanced. The Edwardian age - when the hotel was originally built - and the Art Deco period - when it was significantly extended - were clarified and celebrated to their full.

RESIDENTIAL EXPERIENCE

WHITELEY PENTHOUSES

VALUE
£4.4 million

LOCATION
Queensway,
W2

ONGOING

We delivered the high-end fit out of two luxury penthouses within the iconic Whiteleys redevelopment - one for a private client and one for a high-net-worth individual. The works comprised the fit out of the 710S and 910C penthouses, including all related finishes, bespoke joinery, services installations, and external terrace works.

Located within the flagship Six Senses Hotel, the works were carried out in a fully occupied, live environment that included 139 residences, 14 branded apartments, and extensive hospitality and leisure spaces. Given the building's rebrand and premium positioning, careful coordination was essential to ensure zero disruption to hotel guests and residents. Our team was experienced in operating within complex mixed-use environments while maintaining the highest standards of discretion and quality.

1 PALACE STREET

VALUE
£11.00 million

LOCATION
London,
SW1E

In Progress

Ellmer were involved in the completion of works originally undertaken by another contractor for a high-end residential fit out of 13 apartments, together with other outstanding works across the wider development. The scope also included approximately 4,000 sqft across two third floor apartments within the Beaux Arts building at 1 Palace Street, which were handed over in shell condition as part of the main construction scheme. The works comprised the full fit out of these units to create two luxury residences, including high quality finishes, services coordination and bespoke detailing. The construction of 1 Palace Street remained ongoing and was in the fit out phase, with this package delivered concurrently alongside the main contractor. The project required careful coordination, shared access management and close collaboration to ensure seamless integration with the wider scheme.

VALUE
£36.40 million

LOCATION
London,
W8

COMPLETED
2018

Demolition of the existing NCP car park and construction of a new residential building providing 53 residential apartments ranging from 1 to 4 bedrooms was undertaken.

An underground car park and residential amenity space were provided in a single-storey basement. The proposed building ranged between 6 and 7 storeys above ground. The development was intended to provide 53 high-quality residential apartments and common parts, basement car park and associated external works.

The approximate area of the building was 82,000 sqft. The site was enclosed on three sides, with the Grade II listed “Greyhound” public house on the south boundary, the American College to the north and Kensington Court Gardens to the rear of the site.

53-56 HANS PLACE

VALUE
£40.00 million

LOCATION
*Knightsbridge,
SW1x*

COMPLETED
2017

This new development, on the corner of Hans Place and Herbert Crescent, comprised 13 luxury apartments and drew its design inspiration from the richly detailed rose red brick buildings which lined the garden square, and which formed the character of the conservation area.

The new buildings were a contemporary interpretation of the local vernacular with finely detailed brick carvings to the façades. The pattern was a modern take on the elaborate decorations found on surrounding Victorian buildings.

The buildings facing Hans Place were divided into four separate elements, each with an individual architectural treatment to preserve the historic urban grain of four individual houses completing this terrace. However, by employing the same materials and building techniques, the buildings were tied together to ensure their contribution to the overall conservation area.

FURNIVAL HOUSE

VALUE
£15.90 million

LOCATION
*London,
N6*

COMPLETED
2016

Furnival House was a listed Grade II Edwardian building built between 1916 and 1919 as a hostel for the domestic staff of the Prudential Assurance Company.

The building was four storeys high with a semi-basement level and was predominantly of red brick construction with terracotta detailing to strings, quoins, copings and entrance details. The project provided highly serviced modern interiors within the fabric of the listed building using high-quality materials, fixtures and fittings.

The existing floor areas were stripped out together with internal structural alterations, including extensive piling and underpinning works to form a new basement level. Externally, the façades were refurbished and areas at ground level were re-landscaped. The new development provided 15 residential units (a mixture of 3, 2 and 1 bedroom flats), a leisure complex, car parking spaces, refuse and recycling facilities, a new staircase and lifts.

HOP HOUSE

RESIDENTIAL EXPERIENCE

VALUE
£10.00 million

LOCATION
London,
WC2

COMPLETED
2015

The project involved the conversion of the existing office building to provide 29 high-quality residential units. The apartments were a mix of 1, 2 and 3 bedroom units, with lateral apartments on the upper floors and duplex apartments covering the ground and lower ground floor levels.

The scope of works included constructing an extension at roof level to provide a double-storey penthouse apartment and roof garden.

The existing façade was refined and included demolishing and reconstructing parts of the existing façade with new materials. A rear lightwell and two smaller lightwells were formed along the Hop Gardens elevation to provide daylight penetration to the lower ground floor level apartments.

A new twin lift shaft and central staircase provided access to the various floor levels, with individual private staircases linking the two levels within the duplex apartments.

CHARLES STREET

VALUE
£7.00 million

LOCATION
London,
W1

COMPLETED
2012

Ellmers were involved in the design, construction, refurbishment and fit out at 9 Charles Street, set in the heart of Mayfair. The works included a passenger lift to all floors, state-of-the-art technology, and an integrated high-security system with video entry to both the main house and mews.

The main house impressed with its spectacular two-storey reception hall and grand sweeping staircase. In addition to the drawing room, the formal first-floor dining room and the media room, there was an enormous kitchen/dining/family room.

The extensive health and leisure complex, which could be accessed via either the main house or the mews house in Hay's Mews, included a 55ft/17m swimming pool room together with a gymnasium, steam room, sauna, beauty treatment suite, and shower room. The mews offered a spacious reception area with open-plan kitchen, two bedroom suites, a further bedroom and separate shower room. The glass cupola above a second grand staircase accessed both the family room and the health and leisure complex. There was also a two-car garage with direct access to the main house.

PRIVATE RESIDENCE

RESIDENTIAL EXPERIENCE

VALUE
£7.00 million

LOCATION
London,
W1

COMPLETED
2014

Located in an Area of Outstanding Natural Beauty, this project comprised 32,200ft² of luxury living accommodation. The whole residence was surrounded by a lake and moat, giving beautiful views across the local countryside.

The works comprised the renovation of a shooting lodge, three traditional barn conversions featuring a dining/party room, chapel and a substantial new-build extension including a basement art gallery. A new house was constructed using a green oak structure, reclaimed clay roof tiles, with a stone, flint and glass envelope surrounding a central courtyard with extensive landscaping and water features. Reclaimed limestone from Jerusalem and France was used extensively throughout the building. The bespoke cantilevered spiral stone staircase linked the drum into the purpose-built mosque in the basement, where 1.5 million tiles were individually laid. One of the three converted barns created a leisure complex with swimming pool, spa, sauna and hammam.

This project showcased our in-house off-site manufacturing experience, which for this particular project involved developing an innovative solution to construct the WC cores from within, using pre-plumbed modular cubicle rear ducts with attached WC pans and pre-plumbed cubicle divisions with solid surface washbasins pre-installed. The units were combined on-site and, in their temporary condition, left full unimpeded access to the rear plumbed sections for final connections on-site. Once all modules were installed and connected, the external perimeter walls were closed up around the core and final decorative finishes were applied.

This project is under a Non-Disclosure agreement and specific project details are not available.

2012

Ellmers were responsible for the design completion from Stage C of the Category A completion to meet Land Securities' standards, enhanced by a series of bespoke work elements designed to suit the fitout and occupancy of the building by Bain & Co.

40 Strand was originally constructed in the 1950's and substantially extended and re-clad in the 1980's. The office areas of the building, are 13,350m² gross area and 8,660m² nett area. The double height reception fronting the Strand accesses the primary core with a bank of four passenger lifts. Two secondary cores include firemen's lifts. The existing basement is car parking and was to be refurbished as ancillary office accommodation.

All cores were renewed WC accommodation and common parts fitouts with lifts refurbished and cars refitted. Office accommodation was to be fully refitted and enabled for the tenant fit-out to follow. Central plant and riser services were replaced.

110 CANNON STREET

VALUE
£13.00 million

LOCATION
London,
EC4

COMPLETED
2012

110 Cannon Street was originally constructed in the 1970's. The double height reception fronting Cannon Street addresses the central core with its bank of four passenger lifts. Either side, existing voids were enclosed with decorative metal screens and new curtain walling to form new accommodation and a street frontage with lighting and signage. The flanking first floor accommodation was also to be extended with new curtain wall and Analok finished cladding with accessible green roofs at second floor level.

The reception was to be fully refitted. The core to have renewed wc accommodation and common parts fit-outs with lifts refurbished and cars refitted. Office accommodation was to be fully refitted. Central plant and riser services were to be replaced.

COMPLETED
2012

Ellmer Construction](https://www.ellmer.co.uk/?utm_source=chatgpt.com) completed the re-fixing of the planks to the hull of the ship using new bolts. The hull planks required varying degrees of repair and were removed from the ship to undergo carefully managed stages of detailed conservation. Ellmer also supplied and installed the new main deck, forecastle deck, and poop deck, as well as undertaking refurbishment works to Liverpool House, other deck houses, and the ship's boats.

£7.40 million

LOCATION
Covent Garden,
WC2E

COMPLETED
2017

The works included the removal and replacement of the existing glass and steel conservatory restaurant structure, the rationalisation of back-of-house kitchen and welfare facilities, and the formation of a new entrance incorporating a feature staircase and lift.

The works were carried out while maintaining the busy public environment of the Covent Garden Market Building in full operation at all times, including numerous high-end retailers, food outlets, heavy public footfall, and street performers. A flexible workforce was required to manage the public-facing elements of the project, including out-of-hours deliveries and envelope/temporary works installations, with a major emphasis placed on public safety at all times. This approach was key to maintaining the smooth operation of the facility for the client and enabled the successful delivery of the programme within budgetary and listed building constraints associated with the complex project.

PRINCES ARCADE

RETAIL EXPERIENCE

VALUE
£11.00 million

LOCATION
London,
W1J

COMPLETED
2018

The redevelopment involved the sympathetic restoration of the entire Princes House building over several phases. Works to the Grade II listed building comprised demolition, strip-out, and structural modifications.

Ellmer Construction's scope was to progressively modernise the building, including extensive structural interventions, without causing significant disruption to the tenants of Princes House. The building housed BAFTA, along with numerous commercial, office, and retail tenants. The success of the ongoing works relied upon careful and methodical planning to undertake the project effectively whilst recognising the expectations of both the tenants and the general public. Construction activities were efficiently sequenced and meticulously planned in collaboration with the selected supply chain, utilising available windows of opportunity throughout the working week and communicating activities in advance to all stakeholders.

Phase II works included the refurbishment of the Piccadilly Retail Arcade. The works comprised the enlargement and modification of entrances, refurbishment of retail shopfronts, installation of new lighting and stone flooring, construction of a new link bridge and stairs, and the internal refurbishment
